

KORAKOD PHONGDEE (BLACK)

Software Engineer | C++ / .NET | Automation Engineer

Bangkok, Thailand | 095-971-8562 | black.bkp@gmail.com

PROFILE

.NET full-stack developer with software and hardware backgrounds spanning web and desktop applications, REST APIs, embedded systems, IoT, and industrial protocol integration. Experienced in insurance technology, industrial label printing, RFID solutions, rail signaling simulators, and industrial IoT.

WORK EXPERIENCE

Software Developer - Assistant Manager, Business Analyst TBROKER CO., LTD.

Mar 2025 - May 2026
Bangkok, Thailand

- Developed and maintained a web application supporting agents' sales operations.
- Developed and maintained REST APIs integrated with LINE Chatbot, Core Systems, and other external platforms.
- Performed SIT and UAT testing to prevent software malfunctions before release.
- Collaborated with an external penetration testing vendor to identify and resolve web application security vulnerabilities.
- Planned development time and resources and provided technical support to agents and end users.

Software Developer - Customer Service SATO Auto-ID (Thailand) Co., Ltd.

Jan 2024 - Feb 2025
Samutprakarn, Thailand

- Developed .NET web applications supporting Label Printing and RFID solutions.
- Built AEP applications enabling stand-alone printing on SATO printers.
- Delivered tailor-made software, on-site installation, and remote troubleshooting.
- Produced user manuals, system diagrams, man-day estimates, and wireframe demos.

Engineer - Research & Development (Hardware IoT) D.T.C. Enterprise Public Company Limited

Jul 2023 - Sep 2023
Samutprakarn, Thailand

- Evaluated sensors and hardware devices in real-world applications.
- Developed embedded firmware and data processing pipelines for IoT deployments.
- Prepared datasets for AI model training and built IoT proof-of-concept prototypes.

Engineer - Research and Development Contrologic Co., Ltd.

2020 - Jun 2023
Bangkok, Thailand

- Designed desktop, web, and mobile applications for internal teams and clients.
- Processed sensor and controller data via RS232, RS485, Modbus, and LoRaWAN.
- Integrated hardware with existing systems and built POC prototypes.
- Produced user manuals, system diagrams, man-day estimates, and budget plans.

TECHNICAL SKILLS

Frontend: HTML, CSS3, JavaScript, jQuery, Bootstrap, React

Backend: C# (.NET Framework, .NET Core), C++, Python, Lua, Node.js

Database: Microsoft SQL Server, PostgreSQL, MySQL

API & Integration: RESTful APIs, AEP, RFID systems

Embedded / IoT: Arduino, Raspberry Pi, Node-RED, Linux

Industrial protocols: RS232, RS485, Modbus, LoRaWAN

Engineering: SolidWorks, engineering drawing, basic electronics

EDUCATION

Bachelor of Engineering, Mechatronics Engineering

Mahanakorn University of Technology | 2017 - 2020 | GPA 2.81

High Vocational Certificate, Technology Computer Hardware

Eastern Technological College E-TECH | 2015 - 2017 | GPA 3.58

Vocational Certificate, Electronics

Eastern Technological College E-TECH | 2012 - 2015 | GPA 3.89

LANGUAGES

Thai: Native | English: TOEIC 850 (2023)
